January 5, 2026 -- Monday

**ZAPZEST CORP. ANNOUNCES THE LAUNCH OF ALTIORA
LEARNING SYSTEMS AND NEXORA HEALTH SYSTEMS**

Sister platforms unite learning intelligence and human performance intelligence under one vision for the future of human potential.

Edison, New Jersey — January 5, 2026 — Zapzest Corp. today announced the official launch of two sister platforms: **Altiora Learning Systems** and **Nexora Health Systems**, a powerful dual-system initiative designed to advance the future of learning, health, cognition, wellness, and human performance.

Together, Altiora and Nexora represent two deeply connected dimensions of human growth: the mind's ability to learn, reason, communicate, and master knowledge — and the body's ability to regulate, recover, perform, and thrive.

Altiora Learning Systems focuses on academic performance, structured learning, language development, vocabulary mastery, communication, and cognitive growth. Nexora Health Systems focuses on wellness, stress regulation, behavioral design, cognitive clarity, human performance, and health-centered intelligence.

While each platform has its own mission, identity, and specialized ecosystem, both are built from the same foundational belief: human potential is strengthened when learning, wellness, structure, and intelligent support work together.

"Learning and health are not separate from one another," said Zapzest Corp. "The ability to think clearly, retain knowledge, communicate effectively, manage stress, build habits, and perform with confidence depends on systems that support the whole person. Altiora and Nexora were created as sister platforms because academic performance and human performance are deeply connected."

Altiora Learning Systems is designed to help learners strengthen how they think, study, speak, remember, and apply knowledge. Its ecosystem includes **Voxence**, **Altiora Ascend**, **Altiora Lexis**, and **Altiora Intelligence**, each supporting a different part of the learning and academic development journey.

Nexora Health Systems is designed to help individuals develop better daily awareness, stronger routines, improved regulation, clearer thinking, and long-term health-oriented progress. Its ecosystem includes **Civiro**, **ClarityNotes**, **Vitalis**, and **Nexora Intelligence**, each supporting a different part of wellness, cognition, behavioral structure, and human performance.

Together, the two companies reflect a broader systems approach to modern life. Altiora supports the architecture of learning. Nexora supports the architecture of health and performance. One strengthens the mind for academic growth; the other strengthens the human system for stability, resilience, and sustainable progress.

The relationship between the two platforms is intentional. A student cannot fully perform academically while overwhelmed, distracted, exhausted, or emotionally dysregulated. Likewise, wellness and performance are strengthened by clarity, discipline, learning, reflection, and intelligent decision-making. Altiora and Nexora are built to complement one another — each feeding the larger mission of helping people grow with structure, intelligence, and purpose.

Zapzest Corp. developed both platforms as part of a long-term vision to build intelligent systems that support human development across education, health, cognition, and personal performance.

About Altiora Learning Systems

Altiora Learning Systems is an academic intelligence ecosystem powered by Zapzest Corp, focused on cognitive performance, language mastery, vocabulary development, structured learning, academic reasoning, and next-generation education. Altiora helps students strengthen how they think, learn, communicate, retain knowledge, solve problems, build confidence, and perform in academic environments.

About Nexora Health Systems

Nexora Health Systems is a human-centered intelligence ecosystem powered by Zapzest Corp., exploring the architecture of the human system — from nervous system regulation to cognitive clarity, executive decision-making, and behavioral design. Nexora breaks down stress physiology, thought architecture, executive control, and habit systems through a structured, evidence-informed lens.

About Zapzest Corp.

Zapzest Corp. is a technology and intelligence company building systems that support the evolution of human potential across learning, health, wellness, cognition, communication, and performance.
